

# Stronger Together: RSA and CCAP

Members of the County Commissioners Association of PA (CCAP) are eligible for exclusive pricing on RSA identity and access management (IAM) solutions, including multi-factor authentication (MFA), passwordless authentication capabilities, single sign-on (SSO), and advanced identity threat detection and response features.

## Why RSA and CCAP

This year, the RSA and CCAP partnership uncovered the diverse challenges that Pennsylvania counties face—and the common ground that they all share, including protecting critical resources while adhering to growing regulations under budgetary constraints.

RSA has decades of experience helping government agencies defend themselves against cyberattacks and recognizes the heightened risks local governments face during election years. Our solutions help security-first organizations address the three most common causes of data breaches:

1. **Human error**—weak passwords, phishing attacks, push-notification bombing
2. **Privilege abuse**—data exfiltration, system tampering, lateral movement
3. **Credential theft**—brute force attacks, man-in-the-middle attacks, keylogging

## About RSA

Founded in 1982, RSA pioneered multi-factor authentication and remains the world's identity security leader. RSA secures the most secure organizations in government, energy, financial services, healthcare, and other critical infrastructure areas, across cloud, hybrid, and on-premises environments. RSA is trusted by:

**9,000+**  
organizations with more  
than **60 million** identities  
across **138** countries

**250+**  
state and local  
government entities

**13 of the 15**  
executive departments of  
the U.S. federal  
government

## Why CCAP members should work with RSA

RSA can provide CCAP members with trusted security solutions that defend against the most frequent cyberattacks, meet government regulations, and leverage innovation to stay ahead of cybercriminals, including:

- Capabilities that align with **NIST** standards and conform with government regulations, including **CJIS** and cyber-insurance requirements
- One consolidated IAM solution providing MFA and universal access control, capable of handling all users, requirements, and applications across cloud, hybrid, and on-premises environments
- Passwordless, **phishing-resistant**, FIDO2-certified authentication
- Real-time risk assessments that leverage machine learning and behavioral analytics for smarter, faster access decisions

## RSA® ID Plus subscription plans

[RSA® ID Plus](#) is a complete identity and access management security platform. As counties work to balance enhancing their cybersecurity posture with budgetary constraints, RSA is pleased to offer special incentives on any of our ID Plus subscription plans for active CCAP members, please reach out to PA account manager Anthony Adamcheck for more information.

- **ID Plus C1:** Cloud-only deployment
- **ID Plus E1:** MFA with cloud, hybrid, and on-premises deployment options with self-service registration capabilities
- **ID Plus E2:** Most frequently deployed RSA subscription plan. Includes Adaptive Contextual Access. Offers SSO portal to eliminate passwords and simplify user experience.
- **ID Plus E3:** The highest-security package applies further security where needed and allows more convenient access where appropriate. [RSA® Mobile Lock](#) and [RSA® Risk AI](#) dynamically monitor devices and access behavior to stop bad actors in their tracks.

## Try ID Plus—for free
